

Candice Garcia  
04/14/24  
Module 5.2

1- The current timestamp can be referred to as the current time if it is easier for a user to refer to it.

```
[mysql> SELECT CURRENT_TIMESTAMP() AS 'CURRENT TIME';
```

```
+-----+  
| CURRENT TIME |  
+-----+  
| 2024-04-14 19:30:36 |  
+-----+  
1 row in set (0.00 sec)
```

```
mysql> █
```

2- Select hour can be referred to as an hour in day if it is more helpful to the user.

```
[mysql> SELECT HOUR ("2024-04-24 07:32:00") AS 'Hour in Day';
```

```
+-----+  
| Hour in Day |  
+-----+  
|          7 |  
+-----+  
1 row in set (0.00 sec)
```

```
mysql> █
```

3-Select month can be referred to as a calendar month if it is more helpful to the user.

```
[mysql> SELECT MONTH ("2024-04-14") AS 'Calendar Month';
```

```
+-----+  
| Calendar Month |  
+-----+  
|          4 |  
+-----+  
1 row in set (0.01 sec)
```

```
mysql> █
```
